

Atul Thomas George

Electronics and Computer Science (ECS) Engineer

GitHub: github.com/atulgeorge8-a11y

SUMMARY

Passionate ECS Engineer blending software engineering and electronics to build innovative products.

Experienced in modern web applications, microcontrollers, and IoT solutions.

SKILLS

- Frontend: HTML, CSS, JavaScript
- Backend & Core: Java, Python, C, C++
- Hardware & Tools: Microcontrollers, Sensors, IoT, Git, GitHub

PROJECTS

Student Grievance Redressal System

A secure, scalable web portal designed to streamline the grievance reporting process for students.

Features a secure login system and an AI-powered chatbot for immediate assistance.

Technologies: HTML, CSS, JavaScript, AI Integration

Smart Dustbin

An innovative electronics project utilizing microcontrollers and sensors for automated waste management.

Automatically opens upon detecting proximity to encourage touch-less hygienic disposal.

Technologies: C, Electronics, Microcontrollers, Sensors

EDUCATION

B.Tech in Electronics and Computer Science

[University Name, Year]
